

EXOCYBER® CAPABILITY STATEMENT

GENERAL INFORMATION

UEI: YFVVTA2B5K64
CAGE CODE: 9QN57

NAICS CODES:

541511 – Custom Computer Programming Services

541611 – Administrative Management and General Management Consulting

541519 – Other Computer-Related Services

518210 – Data Processing, Hosting, and Related Services

CONTRACT VEHICLES:

GSA: 47QTCA24D00CC
SIN Codes:

54151S, 541611, 541519, 518210C

PARTNERS:

 **Microsoft** Partner

 **carahsoft**

 **tableau**
from  Salesforce

 **aws** partner network

ExoCyber is a mission-driven cybersecurity and technology services firm delivering advanced solutions across red teaming, defensive cyber operations, artificial intelligence, IT program support, and enterprise modernization.

We specialize in supporting both classified and unclassified environments with a deep bench of cleared professionals and technical experts. Our red teaming services simulate real-world threats using advanced TTPs and custom exploit chains, while our blue teaming capabilities provide defensive architecture design, endpoint protection, and zero trust implementation. We develop and deploy AI/ML and analytics solutions tailored to complex mission domains and extend platforms like Tableau and Power BI with intelligent automation. Our IT program support spans cybersecurity policy, governance, training, and acquisition management—backed by deep compliance expertise. We modernize procurement with cloud-based contract lifecycle platforms and streamline collaboration through advanced SharePoint and Power Platform solutions. ExoCyber delivers agile, secure software development using modern and low-code approaches to accelerate mission success.

CYBERSECURITY & IT PROGRAM SUPPORT SERVICES

ExoCyber delivers mission-focused cybersecurity and IT program support across both classified and unclassified environments. Our core capabilities span red teaming and adversarial simulation, blue teaming and defensive cyber operations, and full-spectrum IT program support. We bring deep experience in vulnerability discovery, tailored penetration testing, cloud security assessments, and implementing zero-trust architectures and secure systems engineering. Our expertise also includes cybersecurity threat research, policy development, and NIST-aligned governance and compliance support. Our team supports IT infrastructure, cloud environments (AWS, Azure), and data center operations, ensuring resilient, secure, and efficient digital ecosystems for our clients.

RED TEAMING & ADVERSARIAL ASSESSMENTS

We execute mission-aligned red team operations simulating real-world threats across enterprise, operational, and mission systems. From vulnerability scanning to adversary emulation, our approach exposes weaknesses in perimeter defenses, operating systems, and cloud deployments. We include wireless and RF vector assessments and integrate rapid tool development and software engineering to evolve with adversarial TTPs. Our teams bring deep experience supporting DoD and IC red team missions.

BLUE TEAMING & DEFENSIVE CYBER OPERATIONS

We provide cleared cybersecurity professionals to support enterprise and tactical defense. Our blue team services include cybersecurity tool consulting, secure network architecture, endpoint protection, and the implementation of zero-trust principles. We also support systems engineering, hardware security, and continuous monitoring across hybrid cloud and on-prem environments. Our team helps clients meet evolving cyber threats with strong defensive postures and operational cyber resilience.

AI/ML, DATA ANALYTICS, & AUTOMATION

ExoCyber delivers applied AI/ML and analytics solutions that enhance mission insight and operational performance. We design and implement intelligent data pipelines, AI-assisted analysis platforms, and NLP-based extraction tools using models such as GPT. Our work spans SIGINT analysis, agricultural research insight extraction, and CBRNE modeling. We also extend traditional platforms like Tableau and Power BI with advanced data governance, master data management, and custom visualization.

PROGRAM & CYBERSECURITY GOVERNANCE

We support IT program offices robustly through cybersecurity strategy, compliance readiness, and operational management. Our services include cyber threat research, policy development, and NIST-aligned governance, risk, and compliance (GRC). We deliver scalable cybersecurity training programs and awareness campaigns, and support acquisition lifecycle and financial tracking, enabling high-performing, audit-ready programs.

AGILE SOFTWARE ENGINEERING & PLATFORM INTEGRATION

ExoCyber delivers full-stack and low-code/no-code development across Microsoft, Salesforce, and open platforms. We specialize in secure, iterative software delivery using Agile and DevSecOps methods. Our development toolset includes PowerApps, Power Automate, SharePoint Online, Databricks, and SQL Server. From prototypes to enterprise-grade platforms, we engineer resilient solutions that meet security, scalability, and performance needs.

ENTERPRISE CONTENT MANAGEMENT

We have built hundreds of highly customized intranet experiences for the World Bank, the FAA, the IMF, and others. We understand how to blend design and advanced functionality in enterprise content management. Our team has decades of Microsoft SharePoint and PowerApp development on board!
